

nowa szkoła

space for education

nowa szkoła offers a wide variety of products for schools and preschools, including furniture, educational materials, rehabilitation and sports equipment.

The company, established in Poland in 1992, currently employs 150 staff in several departments, such as Development and Design, Carpentry, Upholstery. This enables us to perfect every detail and ensures flexibility and swift reaction to our customers' requirements and suggestions.

We export our products to a great number of countries all over the world. Together we can accomplish more. The holding hands in our logo symbolize our belief that full development of a child depends on harmonious relations between parents, teachers, and the environment, which our products change into an aesthetic, functional and inspiring space.

*Year 2012 is for us – as all the years before – exceptional, so many interesting moments and challenges are still before us; well perhaps it's also time to stop in this headlong rush and look back for a moment because **nowa szkoła** is celebrating already this year, its 20th anniversary.*

None of us has felt the passage of time probably because we have always been so passionately involved in what we are doing.

*The cover of our catalogue 2012 may seem unusual for a company specializing in educational materials and early learning. It is our way of illustrating this past 20 years : three young people – beautiful – like in our logo – two boys and one girl – full of expectations – employees of **nowa szkoła** – working towards a common goal... who would remember that 20 years ago, in 1992, they were making their first steps in learning at preschool ?*

We are happy to share this picture with you. Isn't it the best reward for us who are dedicating our lives to education ?

nowa szkoła

TÜV Rheinland®

TÜV Rheinland Group is a leading global provider of technical and certification services. Founded in 1872 in Cologne, Germany, it currently employs nearly 14000 people in 61 countries. Its mission is to strive for sustainable safety development and high quality of products and services in order to meet challenges arising from the interaction between man, technology and the environment. TÜV Rheinland Poland means Polish specialists and global solutions for quality and safety.

Starting as a team of several specialists implementing TÜV standards and quality management systems, TÜV Rheinland Poland has now become a thriving enterprise with over 100 people in 11 regional offices. This dynamic and sustained growth, hardly possible without the support of the parent company, depends nevertheless mainly on the Polish team of highly qualified auditors and experts in all industries.

The activity of TÜV Rheinland Poland focuses on three areas: certification of systems, security and quality of products, and services for industry. This means in practice that the distinctive blue triangle of TÜV Rheinland Group can be found in certificates for management systems in companies of any size, but also on pieces of furniture, railway products or food articles. The mark guarantees the highest quality of services and products and it builds up the trust of end users.

For TÜV Rheinland Poland clients are the main source of information necessary for setting new service directions. This is why a few years ago Testing Laboratory TÜV Rheinland Poland was created which was accredited to Polish Centre for Accreditation and which comprises the Mechanical Laboratory. The accreditation (under no. 141) allows the Laboratory to certify compliance with Polish Standard. The fact that the TÜV Rheinland Poland quality mark is universally recognized and respected explains why Nowa Szkota has applied for furniture certification from this unit.

We are pleased to announce that we have already received first certificates and that the certification process is and will be continued with a view to achieving absolute certainty regarding the quality and safety of our products, all to the satisfaction of our customers.

NS 1931 Foam activity lounge

Soft & safe play corner is a real encouragement for spontaneous fun and activities involving movement. Large space and soft foam covered with easy to clean and waterproof fabrics ensure maximum comfort of use and enable fun for a group of children. Joyful colours which are combined in an interesting way, introduce a friendly environment and cause that the play corner becomes a favourite fun place for all children

▪ 156 x 156 x 32 cm

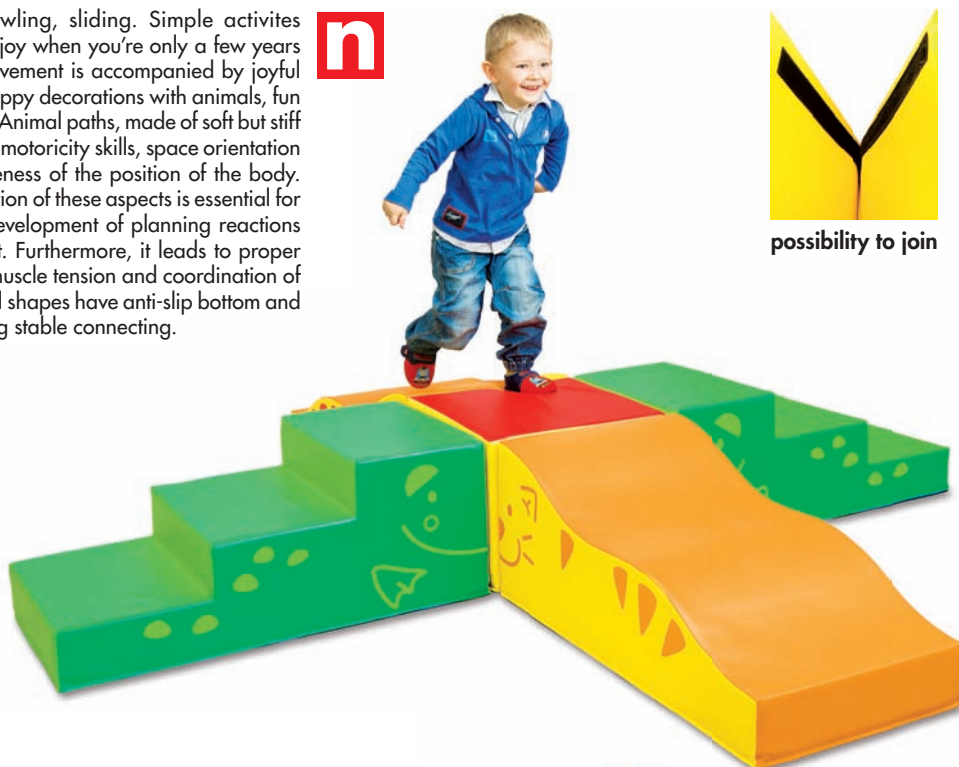

foam and motor skills

foam animal paths

Climbing, crawling, sliding. Simple activities bring a lot of joy when you're only a few years old! When movement is accompanied by joyful colours and happy decorations with animals, fun is guaranteed. Animal paths, made of soft but stiff foam, improve motoricity skills, space orientation and the awareness of the position of the body. Proper integration of these aspects is essential for appropriate development of planning reactions and movement. Furthermore, it leads to proper regulation of muscle tension and coordination of the muscles. All shapes have anti-slip bottom and Velcro enabling stable connecting.

manipulative screens

Space arrangement for children at nursery age is a real challenge. The attention to its safety, functionality, attractiveness and aesthetics should be a priority in designing a place for the younges. Our new line of manipulative partitions meets all of the above requirements. The construction enables unrestricted and artistic arrangement of kids' corners, its visual side changes every play-space into a happy realm great for all children. The screens, designed with the youngest in mind, help improve abilities of small motoricity, engage visual perception and improve sight-movement coordination. The item is made of varnished plywood. It consists of: manipulative tapestry with a horse; safe, moving mirrors; 3D mazes; Zig-Zag maze for graphic activities and a gate with colourful flag.

**n****NS 1594 Multifunction mat with ladybird**

Soft, pleasant to touch mat is a great idea for the youngest children. It provides a safe place while playing. Sound surprises hidden inside arouse interest in mobile activity of the youngest. The mat is completed with 6 colourful and soft cylinders that can be easily joined together. They

can be used both as a back-rest or used separately as elements for developing motor skills. The big, soft ladybird pillow has vivid colours, is an additional attraction which makes the mat even more interesting and creates a worth-exploring area.
