

**nowa szkoła**

# space for education

**nowa szkoła** offers a wide variety of products for schools and preschools, including furniture, educational materials, rehabilitation and sports equipment.

The company, established in Poland in 1992, currently employs 150 staff in several departments, such as Development and Design, Carpentry, Upholstery. This enables us to perfect every detail and ensures flexibility and swift reaction to our customers' requirements and suggestions.

We export our products to a great number of countries all over the world. Together we can accomplish more. The holding hands in our logo symbolize our belief that full development of a child depends on harmonious relations between parents, teachers, and the environment, which our products change into an aesthetic, functional and inspiring space.

*Year 2012 is for us – as all the years before – exceptional, so many interesting moments and challenges are still before us; well perhaps it's also time to stop in this headlong rush and look back for a moment because **nowa szkoła** is celebrating already this year, its 20th anniversary.*

*None of us has felt the passage of time probably because we have always been so passionately involved in what we are doing.*

*The cover of our catalogue 2012 may seem unusual for a company specializing in educational materials and early learning. It is our way of illustrating this past 20 years : three young people – beautiful – like in our logo – two boys and one girl – full of expectations – employees of **nowa szkoła** – working towards a common goal... who would remember that 20 years ago, in 1992, they were making their first steps in learning at preschool ?*

*We are happy to share this picture with you. Isn't it the best reward for us who are dedicating our lives to education ?*

**nowa szkoła**

**TÜV Rheinland®**

TÜV Rheinland Group is a leading global provider of technical and certification services. Founded in 1872 in Cologne, Germany, it currently employs nearly 14000 people in 61 countries. Its mission is to strive for sustainable safety development and high quality of products and services in order to meet challenges arising from the interaction between man, technology and the environment. TÜV Rheinland Poland means Polish specialists and global solutions for quality and safety.

Starting as a team of several specialists implementing TÜV standards and quality management systems, TÜV Rheinland Poland has now become a thriving enterprise with over 100 people in 11 regional offices. This dynamic and sustained growth, hardly possible without the support of the parent company, depends nevertheless mainly on the Polish team of highly qualified auditors and experts in all industries.

The activity of TÜV Rheinland Poland focuses on three areas: certification of systems, security and quality of products, and services for industry. This means in practice that the distinctive blue triangle of TÜV Rheinland Group can be found in certificates for management systems in companies of any size, but also on pieces of furniture, railway products or food articles. The mark guarantees the highest quality of services and products and it builds up the trust of end users.

For TÜV Rheinland Poland clients are the main source of information necessary for setting new service directions. This is why a few years ago Testing Laboratory TÜV Rheinland Poland was created which was accredited to Polish Centre for Accreditation and which comprises the Mechanical Laboratory. The accreditation (under no. 141) allows the Laboratory to certify compliance with Polish Standard. The fact that the TÜV Rheinland Poland quality mark is universally recognized and respected explains why Nowa Szkota has applied for furniture certification from this unit.

We are pleased to announce that we have already received first certificates and that the certification process is and will be continued with a view to achieving absolute certainty regarding the quality and safety of our products, all to the satisfaction of our customers.

- 5 mirrors
- 100 x 65 cm

**NS 1661 Calendar**

Educational tapestry - calendar is an essential equipment in every classroom. On a large format, in a clearly visible way, there are pockets for cards with current year, months and days of the week. Didactic function of the calendar is raised with soft applicaytions showing current weather (6 pcs.) and time of the year with it's typical weather conditions. Their position towards each other and the transparent pockets make it easier for the children to observe in which months seasons change. Furthermore, the pockets have blue rimming. Arrows show the current month and the day of the month. They are placed on large buttons, which effects in extra manipulation exercises. The cards with proper names can be printed out or made by hand during work with group of children. If the cards are in foreign language, the calendar turns out to be a great help in language studies.
