Fish

NS 0991

Manipulative wheel Butterfly

NS 0961

- 55 cm

House

NS 1827

- 3 elements
- length approx. 2m, height 90 cm

2 manipulative sets of 3 pieces. Each MDF piece is in different colour and serves a different task (e.g. finding the way in a maze, binding, sorting). The elements can be joined with colour laces. Very stable.

Train

NS 1828

- 3 elements
- length approx. 2m, height 90 cm

manipulative screens

Manipulative screens. Space arrangement for children at nursery age is a real challenge. The attention to its safety, functionality, attractiveness and aesthetics should be a priority in designing a place for the younges. Our new line of manipulative partitions meets all of the above requirements. The construction enables unrestricted and artistic arrangement of kids' corners, its visual side changes every play-space into a happy realm great for all children. The screens, designed with the youngest in mind, help improve abilities of small motoricity, engage visual perception and improve sight-movement coordination. The item is made of varnished plywood. It consists of: manipulative tapestry with a horse; safe, moving mirrors; 3D mazes; Zig-Zag maze for graphic activities and a gate with colourful flag.

Calendar

NS 1661

Educational tapestry - calendar is an essential equipment in every classroom. On a large format, in a clearly visible way, there are pockets for cards with current year, months and days of the week. Didactic function of the calendar is raised with soft applications showing current weather (6 pcs.) and time of the year with its typical weather conditions. Their position towards each other and the transparent pockets make it easier for the children to observe in which months seasons change. Furthermore, the pockets have blue rimming. Arrows show the current month and the day of the month. They are placed on large buttons, which effects in extra manipulation exercises. The cards with proper names can be printed out or made by hand during work with group of children. If the cards are in foreign language, the calendar turns out to be a great help in language studies.

akto

akto is a way to encourage children to segregate and recycle by involving them in a creative ecological play. The concept is simple - reuse of cardboard and other items to create toys, buildings and objects. Fun with cardboard develops manual dexterity, imagination and awakens a sense of environmental awareness and responsibility in children. The aim is to shape eco-friendly attitudes among children. Our motto is : learn to recycle, recycle to learn. AKTO screw = basic element of the system. Perfectly fits the caps on plastic bottles. The system makes it easy to connect with each carton. 2D Connector = cardboard form allows you to connect boxes in two planes. 3D Connector = cardboard form allows you to connect boxes in three planes. Recycle to learn - learn to recycle
